

A program
for all of Boston's
people

from the
Communist Party.

Highlights of our Program for Boston.

1. There must be jobs for all of Boston's people, at union wages, and with a comprehensive program of affirmative action to guarantee equality.
2. To achieve the power needed to rebuild Boston for all of its people, the organization of all of Boston's workers into trade unions is needed.
3. To guarantee access to all of Boston, to all people, we must outlaw racism.
4. Affordable housing must be guaranteed to all of Boston's people both as homeowners and as tenants. Low interest bank loans and mortgages must be provided, comprehensive rent control established and thousands of new units must be built.
5. For a police department that works for all of Boston's people and that assures that criminal activities are rooted out of our neighborhoods, we must establish a civilian control board.
6. We must restructure the health care system, so that all people have access to quality health care.
7. We must get our transportation system back on the tracks and we must rebuild Boston's roads and bridges.
8. For a democratically controlled Boston, we must establish community councils, and we must elect a government that is responsive to the people's needs, not to the banks' and landlords' profits.
9. To assure the future of Boston let us build a school system that educates all of our youth, and all adults that need training.
10. We must reform Boston's tax system. To finance our program, we must make the banks and big business pay.

A PROGRAM FOR ALL OF BOSTON'S PEOPLE.

The COMMUNIST PARTY of the city of Boston offers this program to advance the interests of all working people of our city. Since the founding of our Party in 1919, Boston Communists have struggled to organize trade unions and to fight for jobs and unemployment insurance. We have fought continuously against racism and for peace. We fought against Hitlerite fascism in the late thirties and forties.

We are a Party of workers, women and men, drawn from the entire multi-racial, multi-national working class. Today, we are active in the struggles for peace, equality and jobs. We work for a strong, class struggle oriented trade union movement, and the unity and leadership of the working class in the struggle against monopoly's reactionary policies. We seek through all our work to build the independent political activity of the working class, working toward an electoral alliance of all working people that can challenge the twin Parties of Big Business, the Democrats and Republicans.

We are joined in our work by the YOUNG COMMUNIST LEAGUE, a multi-racial, multi-national organization of young people that understand that the needs of the young generation can only be met through a struggle against war, racism and the policies of big business.

**Our Nation Is Rich In Resources,
Our People Are Gifted With
Great Skills. Monopoly
Capitalism Wastes Our
Resources and Squanders Our
Skills.**

Our nation has the natural resources, the level of technology and a highly

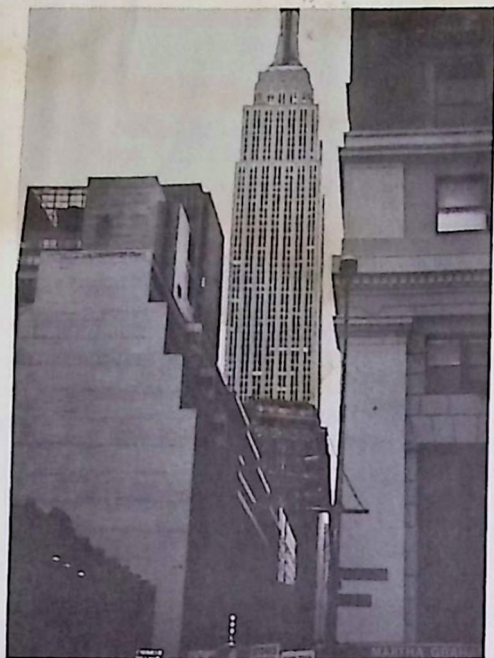

educated and skilled population that can, if organized, tackle and solve the problems of Boston, and all our great cities.

However, monopoly capitalism misuses our vast resources and exploits our people's labor in the pursuit of maximum corporate profits. Tens of millions of our people are unemployed and underemployed while the work that must be done in rebuilding our decaying cities and providing housing for all remains undone. Billions upon billions of dollars are wasted in pursuit of a futile arms race directed against the socialist countries and the working people throughout the world who are struggling for a more just society.

Boston is in the grip of the Big Business and Banks.

Boston is the central city in New England's economy. Boston bankers and insurance companies grasp to themselves the wealth created by workers throughout New England. The hotel, tourist and health care industries, that employ many workers, are also sources of great profit. Capitalism is organized for profits, not for people's needs. The wealth the workers produce goes to line the pockets of the corporate executives, stockholders and the owners of the big banks and insurance companies.

The people of Boston can not find a fundamental solution to their problems without uniting with people throughout the United States to struggle for a re-orientation of our country. We need a government that puts **PEOPLE BEFORE PROFITS**, that spends our tax money not on war and preparation for war, but on the people's needs. We need to

The Big Business Interests Dominate Downtown.

build a mighty coalition against this administration "by the corporations and banks; and for the corporations and banks;" we need to build a coalition to fight for an administration "of the people, for the people and by the people."

Only the people united around a common agenda of political action can forge a movement to tackle the crises of this city. We offer this Communist Party program as a contribution toward building that movement.

For a Democratically Governed Boston.

The working people of Boston make this city run. Without us no bank, factory, hotel, hospital, university, subway or airport could operate. Since we do the work, we have a right to decide its political direction. Instead, politicians in the pocket of the banks and big businesses govern our city with little concern for our needs.

Boston's recent political elections have seen efforts to break the corporate hold on city politics. In these elections Black, Caribbean and Latin American, Asian and white Bostonians have united in various campaigns and electoral coalitions to struggle for our interests instead of the corporations. The most notable among these efforts was the 1983 campaign of Representative Mel King for Mayor and the emergence of the Rainbow Coalition.

The 1985 City Council and School Committee elections present challenges for Boston's people in the struggle for democracy in our city. The first challenge is to defeat right-wing incumbents who actively promote racism and the policies of the banks and real estate interests. Politicians such as "Dapper" O'Neil, "Jim" Kelly, and "Joe" Casper must be defeated. Their opposition to rent control, school desegregation as well as their subservience to corporate and real estate interests does not serve the people of the districts or the city at large. We need to replace them and others with candidates that fight for the needs of the people: for affordable housing, against racism, and for people's unity against the banks and corporations.

The Mayor must come forward with proposals for elected community councils with powers of review and control over the administration of all city services.

We offer the following proposals to advance the needs of Boston's working people.

Boston's Workers Must Be Organized.

No program for Boston's people can be won without the concerted, united and organized activity of the working class. The right to a job at union

wages, to be free of all forms of discrimination, to work in a safe environment, and to be organized into trade unions are fundamental rights of all workers.

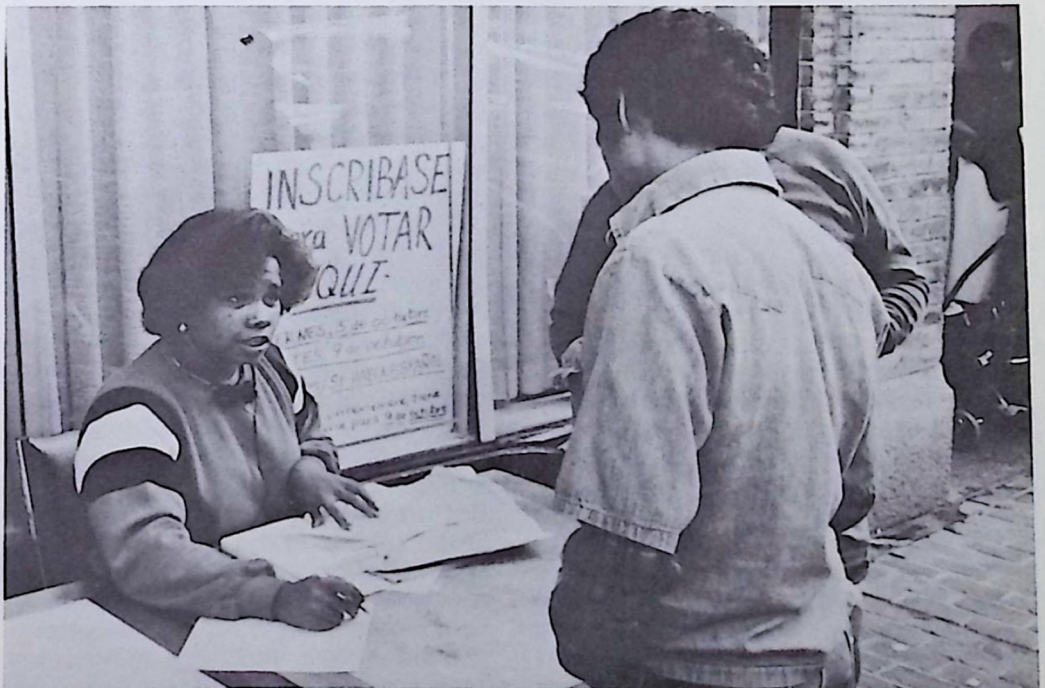

1. First we propose the organization of all of Boston's workers into trade unions. No worker can raise his or her head high without the collective power of a mighty trade union movement. We urge the complete organization of all of Boston's workers into trade unions. The trade unions of Boston must strengthen their unity around a common program of political action. They must work to build their solidarity in face of a corporate offensive to reduce the organization and strength of the working class in this country.

Communists strive to build this solidarity, recognizing that the struggle for the unity of the working class can only be based a struggle for full equality of all workers within our

multi-national, multi-racial, male - female, working class. Racism is the main source of division among workers. The capitalists exploit all divisions in order to produce huge super-profits. To win such equality requires a comprehensive program of affirmative action with definite quotas and timetables for all employers doing business in the city.

Women make up the majority of Boston's workers. Yet, they receive approximately half of the wages of their male counterparts. The working class can not be united without full equality of women. The key to women's equality is the right to be economically independent. This requires equal pay for equal work and for work of comparable value as well as the right to full employment and guaranteed income.

2. We urge a massive effort by all concerned to organize Boston's unorganized workers into trade

We Must Be Organized Politically and Registered To Vote !

unions. In this effort the A.F.L.-C.I.O., its affiliate international unions, the independent international unions and the local unions in Boston bear the primary responsibility. They must mobilize their resources and coordinate their efforts. But all workers and the organizations of working people must join in this effort. The members and their families must be mobilized, and their churches, synagogues, lodges, and community newspapers enlisted. The electronic workers, hospital workers, office workers, restaurant and fast food workers, university workers, as well as unorganized factory workers such as Digital, Teradyne and Gillette must be given special attention. The majority of these unorganized workers are women.

3. We urge the trade unions to lead in the organization of the unemployed. Unemployed workers need organization to help them in the struggle for jobs. They need to be united with the trade union movement in their common efforts to secure a program of unemployment insurance, assuring a pay check for the duration of unemployment, a program that continues all health insurance programs.

We need a program of unemployment insurance for first job seekers, such a program would guarantee unemployment compensation to new, young workers for the duration of their first job search. Such programs have been won in Europe. The trade unions must lend their strength to this effort. The youth are the future for organized labor as they are for our whole country.

4. Boston needs a massive program of publically funded construction. We need to rebuild the decaying water supply system and crumbling transportation system. We advocate a

massive program to rebuild our city's housing (see below). This program of construction and employment is to be developed in co-operation with a federation of the building trades unions, and the organizations of the community on the basis of "Boston jobs for Boston workers" with a comprehensive system of affirmative action.

A cornerstone of the publically funded construction could be a massive program to reclaim Boston's Harbor, to rebuild the Boston area sewage system and develop the recreational potential of the Boston Harbor islands and beaches. Support for Boston's fishing industry through the development of a publically operated shipyard for the construction of the fishing boats should be a stated priority.

The Massachusetts Port Authority (MassPort) should finance this reclamation and development program through its plentiful revenues from the airport.

5. The City of Boston shall ban all programs that create special pools of super-exploited workers such as "free-enterprise zones," and sub-minimum pay schemes. The "undocumented" workers must be guaranteed full legal protection and access to services.

6. We advocate a system of vocational training to increase the jobs skills of all Boston workers, so that all Bostonians can participate in the workforce fully.

These training programs are to be administered jointly by the Greater Boston Labor Council, and organizations of the working class communities, including the Afro-American community, Asian-American community, Native American Indian, and Caribbean and Latin American communities. The program shall include a system of job placement.

The Boston Public Schools must be opened up to all, adult as well as children and youth. Illiteracy must be eradicated and adult education programs provided free of charge.

7. We need a system of public service employment with flexible work schedules and at union wages adequate to provide for a family. These workers are to be represented by trade unions.

8. The state government must require all employers, public and private, to provide full maternity leave with pay for six months with continuity of seniority.

security and medicare system to fund the military budget.

Boston's older workers face huge rent increases and an inadequate health care system. The Boston trade union movement should ally itself with the Senior Citizen movement in the struggle for security and justice.

Open Access For All Of Boston's People To All Of Boston.

The people of Boston, Afro-American, Asian - American, Caribbean and, Latin- American and of European backgrounds live in a wonderful city, full of diverse cultural and recreational

Hospital Worker's Demonstrate For A Better Contract

9. It should become a matter of public policy to seize by right of eminent domain all run-a-way factories. We advocate a public authority to operate these factories.

10. Basic to work with dignity is the right to retire after decades of labor. The situation of older workers is disgraceful. They are impoverished, threatened with more impoverishment by Reagan's robbing of the social

opportunities. But the ugly institutions of racist exclusion, often enforced by lynch law violence, prevent access to all of our city by all Bostonians.

Whole residential and recreational areas are considered "off limits" to people of color. Continuing assaults and acts of terrorism by racist thugs have caused Afro-American families to abandon their homes in public housing. Similar racist provocations

have developed all over the city; few have resulted in prosecution.

The danger of violence denies people of color democratic access to employment opportunities. The trade union movement can not allow these attacks on worker's rights to seek employment and hold employment to go without notice. The City Council and Mayor must assume the responsibility for the fact that the police do not respond.

Boston has many wonderful recreational opportunities: beaches, parks, public facilities, and sports arenas. These too are "off limits" to many Bostonians because of acts of racist violence.

An especially glaring institution of on-going racist harassment exists in the stands of Fenway Park. Here racist violence denies access to the ball games to Afro-Americans. These acts are condoned by the management of the Boston Red Sox.

The Mayor of Boston as the City's chief magistrate must use his police powers

to guarantee open access to all of Boston for all people.

Housing For The People - A Fundamental Right

As Communists, we believe that housing for every family and individual is a fundamental human right, and that it is immoral to treat housing as a commodity in the capitalist market to be bought and sold by the highest bidder. In our Boston today working people can not afford to be housed. Big Banks and Landlords are involved in an organized effort to limit the housing stock available and drive up the price of housing and the costs of renting. Racism permeates the housing situation. Afro-Americans, Caribbean and Latin American peoples, Native American Indians, and Asians are excluded from entire neighborhoods and doubly exploited in ghettos. This racist division hurts all workers by allowing the landlords to jack up rents. We propose these steps to reverse this assault.

Working Class Housing In Dorchester.

1. We urge a massive program of housing construction and rehabilitation. The housing units in the city of Boston must be increased by 50,000 units of new or rehabilitated housing and all substandard housing must be repaired or replaced. Half of this new and renovated housing must be available for individual and co-operative purchase at urban homesteading prices. Half must be made available for rental at rents fixed at 10% of income. At least twenty thousand units must be made accessible to handicapped and elderly.

Allocation of housing to be made on the basis of need, with factors such as family size, adequacy of income to be given first consideration in all programs.

2. The people of the Boston need the immediate construction of 20,000 units of public housing to be located in all neighborhoods of the city. The city must guarantee adequate funding for the operation of all public housing to assure rehabilitation and maintenance. The policy of the Boston Housing Authority must be to upgrade and fill all vacant units. (Today 13,000 applicants await public housing and yet 20% of all public housing units are vacant!)

The authorities charged with maintaining this housing are to be adequately funded. The residents are to be represented in councils with the power of review and control over the public housing authorities, including the right to bring criminal complaints for negligence of maintenance and discrimination in the delivery of services or allocation of units.

3. Tens of thousands of units of housing are sitting idle, while the real estate speculators await their chance to make a killing. We propose public seizure (by right of eminent domain)

of all housing properties held for speculation and of all rental housing stock that is inadequately maintained. These properties are to be brought up to standard and made available to the public according to the provisions of proposal 1.

4. Public funding of a bank for providing mortgages at 5% down and at an interest rate of 5% to families and co-operative associations.

5. A comprehensive system of rent control to apply to all all rental housing with adequate safeguards and supports provided for small owner-occupiers in terms of home financing, rehabilitation loans, etc.

6. The systematic prosecution of realtors and landlords who practice racism and other forms of discrimination in the sale and rental of housing.

7. A law of tenure to apply to all future conversions of rental housing units to condominiums, such that all tenants will become owners upon conversion, their present level of rent to provide payment.

8. Roll back of rents to the level paid in 1982, take the super-profits out of the speculation on the housing shortage.

Stop the Ripoff of the Gas and Oil Monopolies- Stop the Profiteering On Our Energy Needs.

Boston is a wonderful city, but its climate requires that our homes be heated. Boston's Gas and Electric Monopolies and the suppliers of home heating oil have profited for years in this situation.

We propose a simple solution. A city owned utility corporation that will procure and supply at cost plus costs

of operation natural gas, electricity, and home heating oil.

A surcharge of 20% above the costs will be charged banking institutions, insurance companies, large retailers, and manufacturing corporations employing more than ten workers to supply a fund to subsidize the energy needs of the working poor, those on public assistance and retirees.

End Crimes Against Working People.

The working people of Boston are poorly served in terms of protection against crimes against their persons and meager possessions. The Police Department is organized to protect the property of the rich, to prevent the workers from striking, to disperse the democratic forces from protesting the governments unjust policies and to evict "squatters" who presume to make claim to housing.

Organized criminal enterprises in co-operation with the federal agencies and local police authorities conspire to distribute narcotics aimed especially at our youth in order to destroy the people's resistance to their vicious policies. Since Ronald and Nancy

Reagan launched their phony war on drugs, the quantity of drugs imported into our country has doubled.

The destabilization of working class communities is the conscious intention of this "war of drugs.". Increased crimes, street muggings and house burglaries are the immediate result. The poorest among us are the most common victims, especially the elderly poor. Crimes against Afro-Americans, Caribbean and Latin Americans, Asians are disproportionately high.

These horrors are compounded with the horrors of arson - for - profit, and organized criminal enterprises set up for automotive theft and fencing burgled property. For reasons defying comprehension, "our police" can not seem to find the culprits. Criminals who collect the insurance on multiple burned apartment buildings and criminals who openly fence their "hot parts" and appliances in public places can not be found by our police

Assaults against women must be dealt with as crimes of violence. Domestic violence and rape must be treated as a forms of aggravated assault and not "crimes of passion." Racist frame-ups of innocent Afro-Americans as a

Boston's Tenants Need Rent Control.

method of getting the heat off the police department and onto the victims of oppression should be rooted out of the practice of the police department.

The Boston Police Department must be reorganized into an force for the maintaince of the law and the protection of the people's rights. This can only be done through a thorough review of personnel and the expulsion from the department of bully cops and proven racists. The vacancies must be filled with new peace officers representing the multi-racial, multi-national, gender, and language composition of the city. Corruption must be rooted out of the police department.

This can only be done through setting up a democratically elected multi-racial, multi-national male/female community control board that has the powers of review and control over the police commissioner and the entire police force.

The organization of such a democratically organized police force must become a matter of the highest priority for the Mayor and the City Council.

To Give The Young Generation A Future.

A society that wastes its young has no future. The young people of Boston have the right to education and training that will enable them to be productive and self fulfilled adults. They have the right to a future of work that will give them income and a sense of dignity. They have the right to grow up free from the threat of nuclear war, free from the poison of racism. They have the right to grow up well housed, in a secure and crime free city. The concerns of the young are the same concerns as all working people.

Boston's younger people are systematically denied these opportunities and rights. Boston's schools are failing the young. The schools must be adequately funded. The teachers and parents councils must be given more authority in the development of curriculum.

There must be a comprehensive overhaul of the Boston Public Schools, with the School Committee working with neighborhood community councils for the purpose of developing the best possible integrated, bi-lingual educational system. Proposals for "back to basics" curriculums must be rejected as an attack on the educational needs of the next generation.

The system of financing the Boston Public Schools and all of the schools in Massachusetts must be fundamentally changed. The locally administered property tax is a discriminatory and an inadequate funding source for the education of the next generation. Rich suburbs can provide adequate funding for "their" schools at a lower tax rate than can Boston and other big cities. The state government must develop a uniform system of taxation based on wealth, and a distribution system based on per-capita school populations and special needs.

We must ban the Fascist groups, the K.K.K., the South Boston Marshals, etc. that are working among the young to foment racial divisions. High School and College R.O.T.C. should be banned in our city. It should be made a crime to propagate racism and militarism among the young generation.

The unemployment rate among the young is a disgrace and a crime against the coming generation. As many as one third of all young Afro-Americans in our city have never had

an opportunity to work. Unemployment rates reach as high as 50% in many neighborhoods, Black and white. The massive jobs program discussed above will have as one of its aims the guarantee of work to all young people.

We need to develop a city agency of youth services of to work with the youth in the neighborhoods to help them find work, training and recreation.

There needs to be an adequate child care system for the youngest of our young, too many children are "latchkey" children. One of the priorities of establishing the public service employment system discussed above will be to provide personnel for the staffing of a comprehensive, affordable non-racist, non-sexist child care system.

For a Health Delivery System That Delivers.

Boston needs a health care system that can provide quality and affordable health care to all of its people. We live in one of the world's centers of major hospitals and medical schools. Yet many of our people are poorly served in terms of health care.

Working class communities such as South Boston and Roxbury have unacceptably high levels of infant and child mortality.

Boston City Hospital and most of Boston's neighborhood clinics are underfunded. Poor and elderly working people and those on public assistance are the victims.

Many hospitals impacted by the economic crisis are laying off qualified medical personnel. They are also turning away working class patients as "unable to pay." Hospitals operating in the city of Boston, with tax free status shall be required to treat all who seek

medical aid or face criminal procedures.

All of Boston's women require the commitment from the city to enforce and protect their health needs. These include the right to choose in matters of sexuality: guarantees of full reproductive rights, including abortion, freedom from forced sterilization, access to birth control.

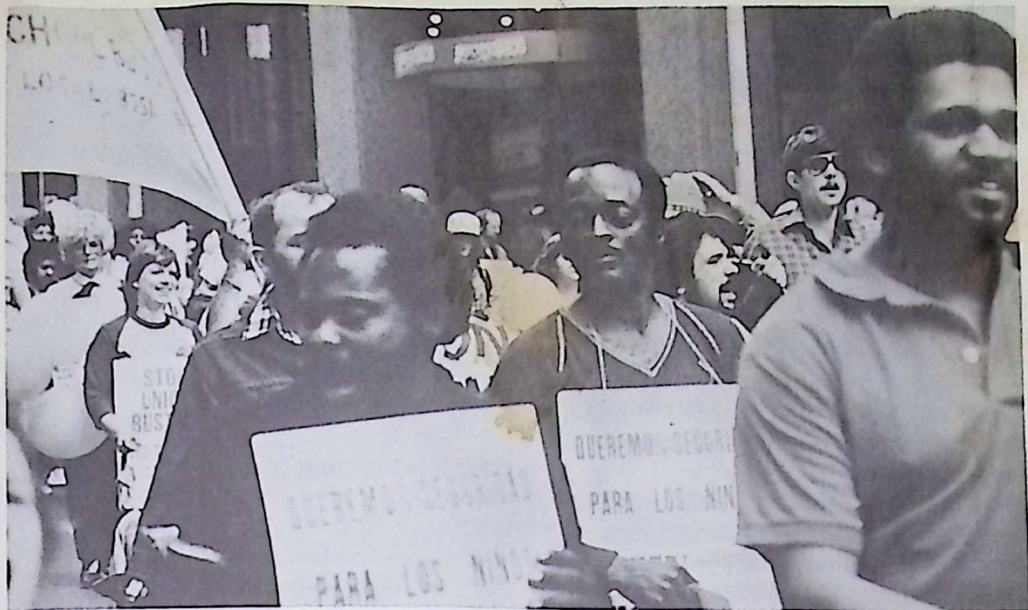

We need a Health Department that works to build a comprehensive system of health and dental care based on need. Particular emphasis must be placed on a system of preventive health care for infants and children

For A Transportation System That Works.

An most important resource for the economic health of a great city and the happiness of its people is a safe and efficient transportation system. Boston's present transportation system has reached a state of decay that at times borders on crisis.

The M.B.T.A. must be upgraded and made accessible to handicapped riders. Bus routes must be increased and the frequency of runs doubled. The desperately needed repairs on the rapid transit, and light rail system must be completed. All retired workers, all unemployed workers, all students are to be issued free monthly transportation passes. The cost of fares and monthly transportation passes is to be reduced by 50%, with free transfers.

The operating cost of financing the M.B.T.A. is to be shifted to a per capita tax paid by employers for each employee. The huge sums now going to pay interest rates on bank held bonds must be stopped. We propose the bonds be paid back immediately in M.B.T.A. tokens.

Black and White Are United In The Labor Movement.

The highways, city streets and bridges are in need of a tremendous reconstruction effort. They are reaching a point where they will be unusable. Citizens are faced with a tangled future of rerouting and the possibility that whole neighborhoods will be cut off because of closed bridges.

The situation on the Central Artery is a crisis, the city's main thoroughfare is clogged most hours of the day. The rebuilding of the Central Artery itself must be immediately implemented.

Financing Our Program - Make Big Business Pay.

An elementary principle of a just system of taxation is those who benefit and can afford to pay should pay for the services rendered. The capitalists benefit way out proportion to what they are taxed, while workers pay way out of proportion to what they can afford.

We demand immediate implementation of a system of property

taxes based on making a distinction between private residential use and commercial use of property. Such a property tax was approved by the voters as a Constitutional Amendment, but was never implemented.

We propose that all cities and towns be allowed to levy a payroll tax on employers of more than 50 employees.

We propose that that 30% of that share of our federal tax dollars now going to the corporations of the military-industrial complex be returned to the city of Boston in the form of revenue sharing. We propose that a proportionate reduction in military spending be instituted at the federal level to make this possible.

We propose a 10% tax on the profits of banks operating in the Commonwealth of Massachusetts be implemented and the proceeds be returned to the cities and towns under a formula that recognizes Boston's special financial burdens as the capital of the state.

We oppose as counter-productive all proposals for property taxes on educational, hospital and religious activities. However, property held by such institutions for profit making purposes should be taxable property.

A City Working For Peace And Justice With The World.

The greatest threat to the people of Boston is the threat of nuclear annihilation. The Mayor, the City Council, and Boston's representatives at the State House and in Congress must make ending the mad and wasteful arms race a priority. They must campaign for the transfer of the huge sums that stuff the coffers of the military-industrial complex to programs that serve the people of this country.

The world is in the process of a fundamental change. All over the world people are throwing off the shackles of colonialism and capitalism and developing socialist and socialist-oriented solutions to the pressing needs of the twentieth century. Corporations and Banks such as General Electric, the Bank of Boston, the United Fruit, Exxon and the whole Fortune 500 gang resist this change because it means that their private fortunes become public property. The people of Boston have no interest in wasting our resources and sending our youth to die in defending the fortunes of these big corporations.

The threat of war flows from the policies of a U.S. government under the control of the Corporations and the Banks, which is waging futile attempts to turn back the process of change. The main direction of this reactionary attack is the Soviet Union, which is the first, the strongest and the most developed of the socialist countries and the bastion of support for those resisting U.S. inspired counter-revolution.

We need to support the activity to develop a relationship with a Soviet Siter City. Such a relationship will include a program of trade, a program that will mean jobs for Boston's workers. We need to demand that Massachusetts Corporations devest in racist and apartheid South Africa.

We must demand that the Reagan administration cease the illegal war against the people of Nicaragua. We must work for just peace in the Middle East that includes a just solution to the Palestinian question.

Bostonians must give special attention to the U.S. colony of Puerto Rico and to its people both in Puerto Rico and here in Massachusetts. We must demand as a City, the independence of Puerto Rico. We must pay attention to the U.S. District Court of Boston which is the appeals court for Puerto Ricans being prosecuted in their struggle for independence. We must work for full bi-lingual education and bi-linguality in our city institutions.

Socialism Is The Future For Our Boston, For Our Country.

As Communists we are convinced that the workers and other honest people in the course of struggle for a fundamental re-orientation of the priorities of our city of Boston, and of our Nation as a whole will become convinced that capitalism is an exploitive and outmoded system. Workers will see in the course of struggle that racism and male supremacy are not only anti-human and devisive policies but a basic part of the capitalist set up. Understanding will grow that only by replacing capitalism with socialism can the resources of our nation and the skills of its people be fully developed and utilized.

For Socialism to be realized the working people must take political

Bostonians Must Fight For Peace.

power into their own hands. Socialism means a new way of organizing society, namely the ownership and control of the factories, mines, forests, transportation system, and the banks by the workers themselves. This requires a fundamental change in who has economic power and political power. It means replacing the the class of capitalists who live off our labor with the people whose intellectual and manual labor produces all of the wealth. This is the Socialist Revolution.

Despite all the slanders of the capitalists and their media, the Socialist Revolution and the socialist society that it produces is the most fundamentally democratic of human endeavors. It can only be the result of the most concerted movement of the vast majority of the citizens of any country. No conspiracy or acts of a minority can impose socialism on an unwilling majority.

The capitalists will try through any means possible, including fascist terror to prevent the people from exercising their democratic will. But a people sufficiently organized, united

and determined will be victorious.

Socialism is not a utopian ideal. One third of humankind has already embarked on the road to building socialism. While there have been mistakes and great difficulties, the socialist countries have proven that the working class can exercise political power and organize economic life for the people's benefit. Tremendous democratic advances such as the right to a job, education, health care and housing have been established. Real equality between people is being built.

As the political party of the working class, the Communist Party works in the struggles of today to win the maximum economic and democratic gains that can be wrung from a fundamentally reactionary, racist, and exploitative capitalist system. Socialism is the aim and purpose of the Communist Party.
